

Stories that include families and friends navigating everyday life can help readers connect to characters experiencing situations similar to their own.

This can provide a path to better understand things readers may be dealing with, like changing family dynamics, navigating new schools, making new friends, and coming to terms with new living situations and relationships.

During the craziness that is the current world we live in, spending time with friends & and family looks a little different these days. Here's to hoping these books may help readers feel a little less alone.
